EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Cawley on May 12, 2004.

- 2. The application has been amended as follows:
- Replace claim 21 with the following:
 "An isolated polynucleotide consisting of nucleotides 252-1673 of SEQ ID NO: 1 or fragment thereof which encodes a transcription regulator protein that inhibits lysine production in a bacterial cell."
- Cancel claims 37 and 38.
- Replace claim 40 with the following:
 - "An isolated polynucleotide which hybridizes under stringent conditions to the complement of SEQ ID NO: 1 and encodes a transcription regulator protein that inhibits lysine production in a bacterial cell, wherein said stringent conditions comprise washing in 0.5X SSC at a temperature of 68°C."
- Replace claim 41 with the following:
 - "An isolated polynucleotide which hybridizes under stringent conditions to the complement of SEQ ID NO: 1 and encodes a transcription regulator protein that inhibits lysine production in a bacterial cell, wherein said stringent conditions comprise washing in 0.1X SSC at a temperature of 68°C."
- In claim 44, line 1, delete the word "essentially".
- 3. Claims 20-22, 27, 32-36, and 40-45 are allowed.
- 4. The following is an examiner's statement of reasons for allowance:

Applicants' novel and unobvious invention is directed toward an isolated polynucleotide encoding a transcription regulator protein that inhibits lysine production in a bacterial cell, a vector comprising said isolated polynucleotide, and a host cell transformed with said vector. The

Art Unit: 1652

prior art neither teaches nor suggests an isolated polynucleotide having a nucleotide sequence of SEQ ID NO: 1 or an isolated polynucleotide encoding a transcription regulator protein that inhibits lysine production in a bacterial cell having an amino acid sequence of SEQ ID NO:2.

- 5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christian L Fronda whose telephone number is (571)272-0929. The examiner can normally be reached Monday-Friday between 9:00AM 5:00PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapura N Achutamurthy can be reached on (571)272-0928. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
